SUMMARY

Chartered accountant moving into data analytics. One year in an analyst role, seven years in finance before that.

EXPERIENCE

Data Analyst, Financial services firm (2025 - 2026)

- Build the monthly management reporting pack. Moved it from Excel into Power BI.
- Write SQL to pull from the general ledger and the customer system.
- Started using Python (pandas) for the reconciliation checks this year.

Financial Accountant, Same firm (2019 - 2025)

- Owned the monthly close and the statutory reporting.
- Built the budgeting model the commercial team used for planning.
- Deep familiarity with how revenue and margin actually get booked, which is where most of the reporting errors I now catch come from.

SKILLS

SQL (intermediate), Power BI, Python (pandas, learning), Excel (expert), IFRS.

CERTIFICATIONS

ICAN chartered accountant, 2022.

Google Data Analytics Professional Certificate, 2025.

DataCamp Data Analyst in Python track, 2025.

EDUCATION

BSc Accounting, Lagos State University, 2018.
