SUMMARY

Backend software engineer, five years. Python and Go.

EXPERIENCE

Senior Backend Engineer, Fintech startup (2023 - 2026)

- Build and run the payments API. Go and PostgreSQL, about 2m requests a day.
- Wrote the ledger service and its reconciliation jobs.
- Own the database schema. Heavy SQL, including query optimisation and window functions in the reporting endpoints I built for the internal admin tool.
- Python for tooling, scripts and the data migration work.

Backend Engineer, Software consultancy (2021 - 2023)

- Built REST APIs for client projects in Python (Django) and Node.
- Some data pipeline work moving client data into PostgreSQL.

SKILLS

Go, Python (Django, pandas for scripts), PostgreSQL, SQL (advanced), Docker, Kubernetes, AWS, Git.

EDUCATION

BSc Computer Science, University of Benin, 2020.
