PROFILE

Five years in analytics, most recently in payments. Comfortable owning a question from "why is margin down" through to the recommendation.

EXPERIENCE

Data Analyst, Interswitch-scale payments processor (2022 - 2026)

- Own the transaction and settlement reporting. SQL models feeding a Tableau workbook the commercial and risk teams both run on.
- Designed the experiment framework for pricing changes. Ran 14 tests over two years; three shipped, and the largest added 0.08% to blended take rate.
- Python (pandas) for cohort and lifetime value analysis. Built the merchant LTV model the partnerships team uses to size deals.
- Reduced the settlement reconciliation report from a 3-hour manual process to a scheduled 12-minute job.

Analyst, Retail chain, category team (2021 - 2022)

- Weekly category performance reporting in Tableau for the buying team.
- SQL against the POS warehouse, including window functions for basket analysis.

SKILLS

SQL (advanced), Python (pandas, scipy), Tableau, experiment design, dbt (basic).

EDUCATION

BEng Electrical Engineering, Ahmadu Bello University, 2020.
